

Internet Hotspot Solutions for Church Bible Study

- ❑ High performance Internet gateways that are simple to install
- ❑ Plug and play: the easy to use wizard speeds installation
- ❑ Custom login page with client branding, choose from 12 backdrops or create your own design
- ❑ Protect with the built-in disclaimer; the legal disclaimer can be edited
- ❑ Seven login options are available
- ❑ Authenticated access uses codes that are generated and managed on the unit
- ❑ A firewall protects the business network from hackers with PCI DSS compliance
- ❑ Master bandwidth control, and individual bandwidth settings for each code
- ❑ Content filtering is available to ensure a family friendly Internet service
- ❑ Monitor Internet utilization through comprehensive reports
- ❑ Access code API for PoS and PMS applications
- ❑ Remote access and configuration
- ❑ Free Cloud management service

Wireless Internet access has become very popular with faith-based organizations as a tool for Bible study classes using online resources. Internet WiFi Hotspots are a valuable resource for teaching, however they permit users to access any website on the Internet which might be a distraction.

Administrators can use Guest Internet gateway products to restrict Internet access to only the Bible study websites that are used for the classes. This is possible because GIS gateway products can be configured as a 'walled garden' limiting Internet access to only those websites that are permitted on the login page. Access to all other websites such as Facebook and Google can be blocked.

Ensure that users access only the websites that you want them. Spend less on your Internet connection while having the connection shared with more people.

Approved websites are shown on the login page as buttons: clicking a button takes the user to the website. We can advise you how to develop your own custom login page.
